## WORK EXPERIENCE

### People Corporation – Application Developer

June 2014 – Present

- Develop a new application that consolidates information of new potential clients, existing clients', their group benefits information, and generates various reports.
- Improve ease of group benefit enrolment by creating a customizable wizard and Excel parser that could be deployed on a per-client basis.
- Improve internal communication by developing a web portal application with customizable content, permission controls, and Active Directory integration.
- Maintain all active applications.
- Update and maintain corporate and partner websites.
- Provide HelpDesk support for all development related issues.
- Provide in-person and WebEx user training.
- Wrote various project user documentations to supplement user training.

### iQmetrix – Web Developer

January 2013 – April 2013 (Co-op Work Term III)

- Maintained the intranet website for clients. Tasks included fixing reported bugs, implementing new features, and resolving support requests.
- Perform code reviews with peers.
- Attended daily morning scrums and bi-weekly iteration planning.

### Agriculture and Agri-Food Canada – Small Systems Analyst

May 2012 – August 2012 (Co-op Work Term II)

- Implemented a PDF generator function within Excel.
- Developed various internal single-page web applications.
- Attended requirement meetings with other departments.

### Geomax Mobile Corporation – Wireless Application Developer

September 2011 – December 2011 (Co-op Work Term I)

- Updated their web application that kept track of invoice documents throughout their processing phase.
- Attended customer meetings for software reviews and requests for additional features for the web application.
- Performed software releases.
- Updated the Geomax Mobile website.
